Care Before & After

Caring for your skin can prevent complications and ensure that the tattoo heals properly. Gently wash the area with soap and water twice a day. Apply a thin layer of fragrance and alcohol free ointment 2 to 4 times a day. Recommend ointment may vary for skin types, tattoo styles, artwork size, placement in the body, or even the weather.

Dry winter often requires more attention than a humid summer. Choose ointments A+D that can create a thin layer over your skin. Extra attention on the first 3 to 5 days. Avoid swimming, bathing, sauna, intense exercise, scratching, or applying pressure. Wear comfortable clothes and care with sunscreen after 10 - 15 days only.

ISSUES

There are so many things involved in tattooing that some techniques are expected to work better than others, heal faster or slower, also be best suited to a body part or skin type. I keep an open communication during the aftercare, so if you experience any issues, contact me via Whatsapp.

RESCHEDULING

After many cancellations during corona, I implemented a feature to let you reschedule your session on your own. Through my website, choose another available date and time, your current session will be canceled, and a new one confirmed. A message with the details and a calendar event will be sent to your email. You have until the day before your current session to make any changes.

So, thanks for your time and I hope I have answered some of your questions. If you need more information, you will find more details on my website in the FAQ.

Send your idea, buy one of my Wannados designs, or reserve your spot on my next FlashDay.
